

**The EO Network of Resources (NoR) initiative promotes the use of European resource and platform services to facilitate a simplified and efficient exploitation of EO data in cloud environments.**

# The NoR in a Nutshell

Facilitating a simplified and efficient exploitation of EO data in cloud environments.

A directory that lists selected services ready to procure and use by research, development, pre-commercial and commercial users.

Providing funds for eligible projects and promoting the use of European resource and platform services.

A NoR helpdesk staffed with remote sensing and IT experts working closely with the providers, and supporting users.

# Benefits for NoR Providers

# Benefits for NoR users

The NoR Directory is a standalone cloudeo store dedicated to remote sensing and GIS experts.

- cloudeo will operate the Network of EO Resources and act as a facilitator for both providers and end users
- create a point of access to available resource and platform providers
- cloudeo's experience in building a market platform lays the foundation for the NoR

A large, solid dark blue circle is positioned on the right side of the slide, partially overlapping the text area.

What does  
cloudeo  
have to do  
with that?

## Where we currently are and where we will go...

- Announcement of Resource Tier Providers about to happen  
-> onboarding of Services on NoR platform
- ITT for Platform Service Providers opening in the next weeks

# Thank you!
